PROFILE

I am a qualified User Interface and Interaction Designer with over 6 years experience in the field. I've worked in a variety of environments, designing for desktop websites and mobile applications.

EMPLOYMENT HISTORY

UI/UX Designer // Silver Pride Software, Derby, UK

August 2014, present

Silver Pride is an agency, which has an in-house CMS but also develop iOS and Android Apps. My responsibilities are:

- Gather requirements from clients and suggest features
- Create navigation flows for mobile applications
- Create wireframes and validate them with clients
- User interface design for mobile apps and web
- Responsive front end development and in-house CMS customization

UI/UX Designer // SeeTickets.com, Nottingham, UK

March 2012, August 2014

SeeTickets.com is one of the biggest ticket reseller in the UK. I've completely redesigned the website, mobile website and client console and added various features over the years. My responsibilities were:

- Gather internal business requirements and negotiating best solutions
- Redesigning the website to improve findability and usability and make the interface look modern and clean.
- Liaising with developers to understand the complexity of the website structure and account for that on design decisions
- Planning features added over the years

Hourly Paid Lecturer // Nottingham Trent University, UK

October - December 2011

I team-taught a first year Multimedia programme module on Interaction and Animation.

The work involved planning classes to help students develop an interactive space, introducing them the concept of User Experience.
